Experiment with different formatting combinations, without compromising your content!

Summary of features

Languages

- Output column headers and other terms in: English, Spanish, French, German, Italian or Portuguese.
- Simultaneous bilingual development of content in two languages (single-byte).
- Develop in one or two languages at a time.

Content

- Create tables with topics and sub-topics.
- Hide topics and items you don't want to output, without deleting or losing them.
- Add a description, code or date to each item.
- Create your own item rating scales.
- Add "keywords" for full-text searches.
- Include existing HTML pages as a topic.
- View selected HTML page in your preferred HTML browser.
- Edit selected HTML page in your preferred HTML editor.

Minimal Requirements

Windows

- Windows 95, 98, 2000, NT, XP
- Resolution of 800 x 600
- Pentium 266 MHz processor
- 32 MB RAM
- Sound 16 bits (optional)

Macintosh

- OS 8
- Resolution of 800 x 600
- Power Macintosh with Power PC Processor
- 32 MB RAM
- Sound 16 bits (optional)

Media handling

- Use Images, Quicktime, Flash and Windows Media files
- View the project media in a list, as a whole or per topic.
- Modify images: scale and JPEG quality.

Efficiency in production

- Import existing item lists from TAB-delimited text files.
- Batch import folders of media or HTML files, with sub-directories.
- Save your search results as topics.

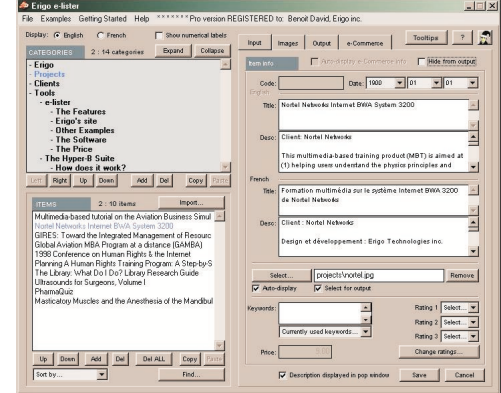

e-Commerce

- Specify item code, price, buyer options and choices, shipping & insurance costs, etc.
- Compatible with most Shopping Cart Service Providers.
- Specify up to three item options (such as gift wrapped, plain wood, etc.) and up to three choices list (such as color, size, finish, etc.).
- Selectively include "Add to cart", "View cart" or "Go to checkout" buttons in your output.

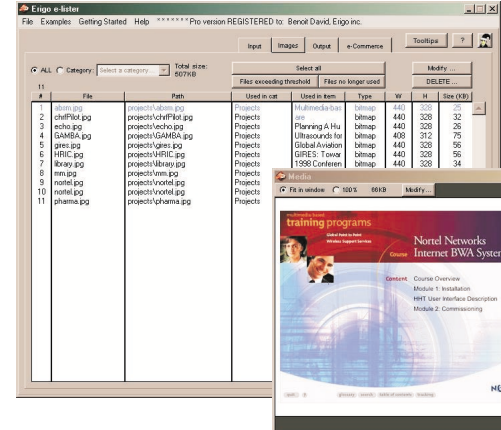

Output

- Export in TAB-delimited TEXT or Microsoft EXCEL files.
- Include a linked Table of Contents.
- Present your lists in up to 5 columns.
- Selectively include images.
- Present media as clickable thumbnails.
- Generate your lists using a variety of generic HTML templates.
- Customize each output: font, color, indentation, separators, border, etc.
- Customize existing Erigo e-lister templates or create your own.
- Use cascading style sheets (CSS).
